The Mark

Primary lockup (horizontal)

Stacked lockup

Clear Space & Minimum Size

Keep an area free of text, imagery, and other marks around the logo.

Minimum clear space = 1× the width of the mark's vertical stroke, measured on all sides.

Minimum size

Digital
24px tall minimum

Print
0.3 in / 8 mm tall minimum

Below these sizes the interlocking strokes lose definition. In slide decks, never shrink the mark smaller than the height of a line of body text. In documents, the same rule applies to header and footer placements.

Color Variations

FULL COLOR — ON LIGHT

INK — SINGLE COLOR, ON WHITE

WHITE — ON TEAL

WHITE — ON INK / PHOTOGRAPHY

Use full color whenever the background allows sufficient contrast. Drop to the single-color ink mark for one-color print, letterhead, or watermark use. Use the white mark only on the teal brand color, on the ink color, or on photography dark enough to keep full contrast with the mark.

Misuse

Don't recolor the mark outside the approved palette

Don't stretch or distort the proportions

Don't rotate the mark

Don't add drop shadows, outlines, or other effects

Don't place a dark mark on a low-contrast background

Smean

Don't rebuild the wordmark in another typeface

Color Palette

Suggested usage ratio — slides & documents

Typeface One — Georgia

Aa

DISPLAY & HEADINGS

Georgia carries weight and warmth at large sizes, so it leads on slide titles, section dividers, and document headings (H1–H3). Its sturdy serifs stay confident even when projected or scaled down in a thumbnail.

ABCDEFGHIJKLMNOPQRSTUVWXYZ 0123456789

NOPQRSTUVWXYZ nopqrstuvwxyz

Regular **Bold** *Italic*

Typeface Two — Cambria

Aa

BODY & DOCUMENTATION

Cambria was drawn for clarity at small sizes on screen, which makes it the workhorse for paragraphs, bullet lists, tables, captions, and dense reference documentation — anywhere Georgia would feel heavy.

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklm 0123456789

NOPQRSTUVWXYZ nopqrstuvwxyz

Regular **Bold** *Italic*

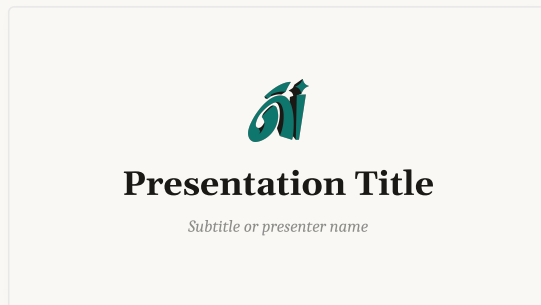

Pairing rule: Georgia sets anything a reader scans in seconds — a title, a headline, a divider. Cambria sets anything a reader actually reads — a paragraph, a caption, a table cell. Never use both typefaces for the same line of text.

Type Scale

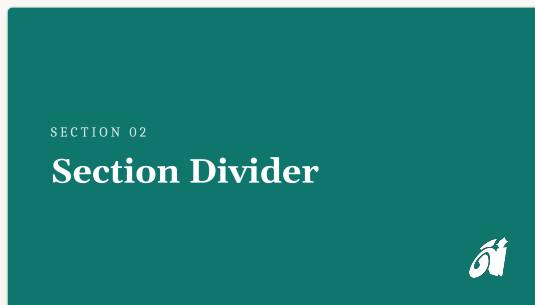

STYLE	SLIDES (16:9)	DOCUMENTS	TYPEFACE
Title / H1	40–44 pt Bold	24–28 pt Bold	Georgia
Subtitle / H2	24–28 pt Regular	18–20 pt Bold	Georgia
Section head / H3	28–32 pt Bold	14–16 pt Bold	Georgia
Body text	18–20 pt Regular	11 pt Regular	Cambria
Caption / footnote	12–14 pt Regular	9–10 pt Italic	Cambria
Table / UI text	14–16 pt Regular	10 pt Regular	Cambria

Line height: 1.2× for Georgia headings, 1.4–1.5× for Cambria body copy. Keep line length in documents to 70–90 characters for comfortable reading. Neither typeface includes a monospace cut — for code samples, pair with a system monospace font such as Consolas or Courier New.

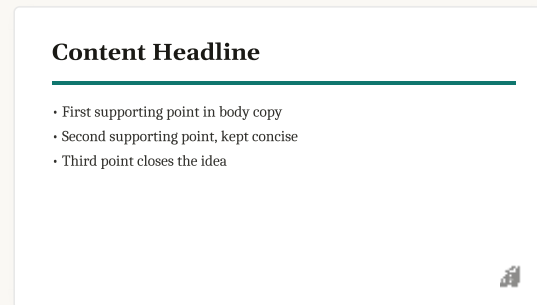

Slide Templates

Title slide

Section divider

Content slide

Titles and section headers set in Georgia Bold; body copy and bullets set in Cambria. Keep the mark small and consistent in a single corner across a deck — don't move it slide to slide.

Documentation

Quarterly Report Title

Body paragraphs are set in Cambria at 11 pt with 1.4× line height, matching the density readers expect from a standard report or specification document.

Callout / note — a teal rule and pale teal wash flag important context without interrupting the reading flow.

METRIC	VALUE	CHANGE
Coverage	92%	+4%
Accuracy	87%	+2%

Cheat Sheet

COLOR
